

Sinclair Broadcasting has decided to become involved in the presidential election. This is something that frightens me very much. With the lessening of rules of ownership, we could wind up with a few like-minded companies controlling the information the American public gets. Under the guise 'News' they will air material with only the political spin they want. This is not what America is about.

Please ensure that Sinclair behaves in a manner that is socially responsible, their actions are an attempt at directly affecting the outcome of a political event. Sinclair must leave the decisions of the republic to the citizens. The public airways are not used to make news, they are to be used to report news.

The actions of Sinclair have convinced me that the groups against easing the ownership rules were correct! We cannot allow abuses of this nature in a free society.

Thank you.
